## Introduction

### Innovation through experience

**Concept General Supplies and Contracting Company** is a leading company in providing contracting and supply services, specializing in various sectors with a special focus on hospitals, pharmaceutical factories, research institutes and mega projects. One of the advantages of **Concept Company** is the presence of cadres that have worked on the largest mega projects in the Arabian Gulf region and in the Kingdom of Saudi Arabia in particular, such as **the Jeddah Airport Project and the expansion project of the Holy Mosque - Al-Shamiya**. This has given us experience in Mega projects. Concept Company cadres have also contributed to the design, follow-up and supervision of the largest projects in the United Arab Emirates, such as the Burj Khalifa project and the Jumeirah project. Thanks to our unwavering commitment to quality, safety and innovation, we have gained a good reputation for excellence and reliability in Egypt and throughout the Gulf and the Middle East.

### GASKET

Concept General Supplies & Contracting Company combines superior quality with exceptional customer service in manufacturing and exporting gasket materials. We constantly interact with the industry to obtain the best in terms of design, durability and quality to provide the best solutions to our customers. We make gaskets in various types and shapes including

Spiral, oval, octagonal and metal. Hot galvanized, Teflon coated. And 100% asbestos free gaskets

PTFE, ceramic, lead, bronze, copper, steel, carbon, soft iron, titanium, austenitic steel for urea application, special steel, nickel, etc

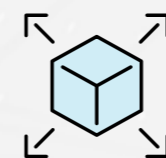

## Products

### Teflon - PTFE

Teflon can be used in a wide variety of applications as it has an unparalleled combination of mechanical, electrical, chemical, temperature and friction resistance properties. PTFE has a very high melting point and is capable of continuous service at 500°F (260°C). It is the most chemically resistant plastic available and only a few chemicals react with it. The mechanical properties of PTFE are low compared to other engineering plastics, but its integrity is maintained over a wide temperature range - from -400 to 500°F (-240 to 260°C). Mechanical properties can be improved by adding fillers such as fiberglass, carbon, graphite, molybdenum disulfide and bronze. PTFE has excellent thermal and electrical insulation properties along with a low coefficient of friction. PTFE is difficult to bond. Concept General Supplies and Contracting Company provides many Teflon products in different shapes Gaskets, Sheet, rod, tube, film
